Reusable ECG Leadwires

Easy connection. Accurate measurements.

GE ECG leadwires help you reliably make the correct connection to GE monitoring devices. These high-quality reusable leadwires complement your monitoring equipment, enabling accurate measurements.

GE leadwires undergo strict testing to help ensure quality, reliability and safety. They have been tested and verified as compatible with GE monitoring devices¹ to deliver optimum performance and a high standard of care.

Durable

Chemical-resistant jacketing extends service life, facilitates cleaning and remains flexible to withstand bending and twisting and enhance patient comfort.

Ease of use and efficient transfer

The leadwires are fast and easy to apply with clearly labeled, color-coded snaps and grabbers. Reusable leadwires can help improve efficiency in patient transfers by allowing patients to wear only one dedicated leadwire set throughout their hospital stay, if the facility is completely standardized.

Features

GE ECG lead wires are available in 3-, 5-, 6- and V-lead configurations. Leadwires are electrically shielded to protect ECG signal integrity.

Product compatibility

The ECG leadwires are compatible and validated with the following GE equipment:

- CARESCAPE™ Monitors B450/B650/B850
- CARESCAPE Patient Data Module (PDM) and Patient Side Module (PSM)
- B105/B125 patient monitors
- B20/B40 and B20i/B40i patient monitors
- Solar™ monitors with CARESCAPE Patient Data Module

ECG trunk cables are also compatible with GE ECG leadwire sets.

Accessories simply compatible with your equipment.

You can trust GE Healthcare accessories and consumables to keep your clinical devices working efficiently.
